Welcome!

Welcome to the exciting world of Family Medicine in New York City. The Harlem Residency in Family Medicine offers an innovative training program for those who want to make a difference for America’s most medically underserved individuals. We are committed to the provision of comprehensive, coordinated, and culturally competent care to our community, and are devoted to providing our residents with the tools, skills, and vision necessary to become excellent clinicians and patient advocates.

New York City has been a safe harbor for waves of immigrants, creating a rich fabric of diverse neighborhoods. We serve a broad array of patients, spanning many cultures, ages, and socioeconomic groups, including those who are uninsured. Our residents care for and act as advocates for our patients and their communities.

Our program trains residents for leadership positions in a complex urban setting. We pride ourselves on the breadth of training opportunities we provide. Our health center employs the most innovative health information technology available to promote preventive care and health information exchange, including a patient portal in English and Spanish. Our advanced technology enabled residents to quickly provide telemedicine as an option for serving patients as the COVID-19 pandemic emerged.

Our residents are deeply involved in community outreach. Harlem Residents in Family Medicine are also trained to provide comprehensive women’s health care, including a full scope of reproductive care. We offer you the opportunity to reinvigorate and reinvent health care in New York City as a resident in our program. Come join us in our exciting adventure.

Sincerely,

Neil Calman, MD
President & CEO
The Institute for Family Health

Andrea Maritato, MD
Program Director
Harlem Residency in Family Medicine
About Our Organization

The Harlem Residency in Family Medicine was launched by The Institute for Family Health in 2012 to create a vibrant anchor for family medicine-oriented care and learning in the dynamic, high-need community of Harlem. The Institute is a non-profit organization founded in 1983 to increase access to high-quality primary care services to medically underserved populations. The Institute’s Federally Qualified Health Center (FQHC) network serves as primary care training sites for residents, medical students, and other health professionals. It meets national standards for affordable, accessible, and comprehensive health care services, with accreditation from the Joint Commission and designation as a Level 3 patient-centered medical home by the National Committee for Quality Assurance. It has also won numerous national awards for the innovative use of health information technology in the service of the underserved.

In a unique academic partnership, the Institute maintains an agreement with the Icahn School of Medicine at Mount Sinai (ISMMS) to operate its Department of Family Medicine and Community Health. This partnership includes the Institute’s operation of the Mount Sinai Downtown (MSD) Residency in Urban Family Practice sponsored by ISMMS. The Harlem and MSD residencies operate as sister programs, collaborating on inpatient training, didactics, and additional hospital based rotations.

Our Mission

The mission of the Harlem Residency in Family Medicine is to prepare family physicians to serve as leaders in urban health care. The family practice model of care is based on a holistic approach to health that integrates psychological, social, economic, and environmental determinants of health with biomedical factors.

Our residency program builds upon the comprehensive approach of family medicine with an emphasis on the particular needs of medically underserved communities. In addition to learning how to effectively care for a diverse patient population, our residents will be prepared to assume leadership positions within health care or to work in academic settings that address the needs of the underserved.

We are proud of our residents’ skill and professionalism in addressing the challenges of the COVID-19 pandemic. As family physician residents, they are learning to provide comprehensive primary care to our diverse patients through telehealth and in-person visits as well as state-of-the-art inpatient care supported by advanced clinical and biomedical research. Our goal is to train our residents to provide the best possible care to our patients so that they can live healthy and productive lives.
Faculty

Neil Calman, MD, President & CEO, The Institute for Family Health
Chair, Department of Family Medicine and Community Health,
Icahn School of Medicine at Mount Sinai
Rush Medical College
Montefiore Medical Center, Family Practice Residency in Social Medicine
Special Interests: Health Disparities

Tufts University School of Medicine
Mount Sinai Hospital Internal Medicine Residency
Special Interests: Primary Prevention, Hyperlipidemia, Hypertension, and Nutrition

David B. Weiss, MD, MPH
Attending Physician
Tufts University Medical School and Public Health
Family Medicine Residency, New York Presbyterian – Columbia
Special Interests: Care of people with history of incarceration and other marginalized communities, Quality Improvement for Asthma & COPD
Clinical Training Sites

Residents receive their family medicine ambulatory training in one of two federally qualified health centers operated by the Institute for Family Health. These sites provide comprehensive primary, behavioral health, and dental care to patients of all ages.

**Family Health Center of Harlem**
The Family Health Center of Harlem is located in a robust, culturally diverse neighborhood in Northern Manhattan with a rich history and a widespread sense of community. Over 18,000 patients made nearly 100,000 visits to the FHCH last year. FHCH offers group visits for diabetes and prenatal care, Zumba classes, yoga classes, and more, to help patients stay healthy. Residents are highly engaged with neighborhood organizations in promoting good health and social justice in the community.

**Walton Family Health Center**
The Walton Family Health Center is located in the Bronx neighborhood of Mount Hope. Much of the population is foreign-born originating from the Dominican Republic, Jamaica, Ecuador, Guyana as well as Ghana, Sierra Leone and Nigeria. Nearly 10,000 patients made 50,000 visits last year. WFHC has been a bedrock of affordable health care in the Southwest Bronx for almost 20 years. The health center was built in partnership with St. Edmund’s Episcopal Church and reflects its longtime relationship with the community.

**Mount Sinai Hospital**
The inpatient training site for the Harlem Residency in Family Medicine is The Mount Sinai Hospital, located at Madison Avenue and East 98th Street in Manhattan. Founded in 1852, Mount Sinai Hospital is a 1,134-bed, tertiary-care teaching facility acclaimed internationally for excellence in clinical care.

The Mount Sinai Hospital was named to the U.S. News & World Report Honor Roll in its 2019-2020 edition, ranking 14th out of nearly 5,000 hospitals nationwide. Mount Sinai also ranks in several specialties, and is top 10 in five of those: Geriatrics (#3), Cardiology and Health Surgery (#6), Diabetes and Endocrinology (#7), Gastroenterology (#9), and Nephrology (#10).
Community Engagement

Along with a strong clinical curriculum, the Harlem Residency in Family Medicine also prioritizes community engagement and social justice for disadvantaged populations. Historically, physicians have played a vital role in solving community problems and advocating for policy change that will improve health and the quality of life in these communities. The program’s Community Engagement Curriculum is designed to foster this role by advancing residents’ understanding of the social determinants of health that impact the patients they care for throughout their training.

Working with the Director of Community Health and other faculty, family medicine residents are paired with various community organizations, such as local social services agencies, food pantries, or local public health department offices. Residents provide expertise on matters of community health and work collaboratively with community based organizations on projects that will enhance health in the communities we serve.

Clinical rotations and electives at sites serving special populations further advance residents’ skills in caring for underserved populations. For example, adolescent health is taught in the health clinics of public high schools and in a center for LGBTQ homeless youth. Residents train in a variety of health center sites, such as sites serving homeless populations that are operated by the Institute, a nursing home caring for complex patients of all ages, and other community sites, such as the Harlem Children’s Zone. Residents have exposure to a wide range of health needs.

Residents also engage in outreach and in advocacy at the local, state, and national level. They offer health screenings at local street fairs, conduct community health needs assessments, and march for social justice. Harlem residents have met with members of the New York State Assembly to advocate for community health centers, and have made presentations to members of Congress. Residents are regularly involved in local advocacy for underserved populations at Mount Sinai.

Aimee Mankodi, MD, advocates for the federal Teaching Health Center Program before members of Congress.
Harlem Residency Program Highlights

**Full Spectrum Reproductive Health Training: Comprehensive Nationally Recognized Training**
- Training options in counseling, ultrasounds, and LARC (Long acting reversible contraception)
- Fellowship in reproductive health
- Family physician faculty performing obstetrics
- Innovative group prenatal visit training for all residents (Centering Pregnancy Model)
- Training at affiliated Planned Parenthood sites – Brooklyn, Bronx, and Queens

**Longitudinal Implicit Bias, Advocacy, and Social Justice Training**
- Quarterly seminars focused on implicit bias and advocacy
- Quarterly seminars focused on key social justice topics affecting the community we serve, with a panel of community leaders

**Community Pediatrics and Adolescent Medicine**
- Incorporates national curricular guidelines for adolescent medicine
- Care for LGBTQ youth experiencing homelessness/ unstable housing at Ali Forney, a local drop-in center
- Caring for students at a local high schools, middle schools, and elementary schools

**Resident Well Being**
- Monthly intern support group
- Monthly Balint group
- Resident buddies
- Advisor/Mentor support
- Resident retreats 2-3x yearly
- Class rotations – PGY1, 2, & 3

**Faculty in Biopsychosocial Training**
- Psychologists train residents in counseling and complex patient management
- Resident and faculty Balint groups
- Training in motivational interviewing and behavior change

**Integrative Medicine (IM)**
- All PGY2s participate in a 2-week rotation focused on complementary and alternative medicine
- Additional integrative medicine training available through didactics, electives, and on-line modules

**Training using Electronic Health Records (EHR)**
- Training sites use EPIC, a state-of-the-art EHR, extensive clinical reports for reviewing and improving practice patterns, and a patient portal available in English and Spanish

**The Institute for Family Health is recognized by the CDC as a Center of Excellence for leadership in:**
- Overcoming health disparities
- Electronic Health Records collaboration with NYC Department of Health
